Distance Nearest Occupied Building:

Release Contained: Yes

Type of Incident: Tank Leak

Description of Released Contaminant: Hydrochloric Acid

Volume Spilled:

Ag Related: No

EPA Extremely Hazardous Substance: No

Reported to NRC: No

Cause of Incident:

An approximate 70 gallons of hydrochloric acid was released to the well pad surface when a leaking weld was discovered on a tank.

Risk Evaluation:

There are no immediate risks at this time.

of Fatalities: 0

of Injuries: 0

Affected Medium: 09 - other

Potential Environmental Impacts:

The potential for environmental impacts are very low at this time. All impacted areas have been contained and removed. WPX will follow up to ensure all impacted materials are disposed of in accordance with local, state, and federal regulations.

Action Taken or Planned:

The release was immediately contained to the well pad surface. Liberty Oilfield Services, the responsible party, placed soda ash to neutralize the acid. Crews on-site began shoveling the impacted area into containers for removal and proper disposal.

Wastes Disposal Location: To be determined. WPX Energy will be in contact with Liberty Oilfield Services to ensure the waste is being properly disposed of.

Agencies Involved: NDIC, MHA, BIA, TAT Env.
